

I think that sinclair is violating the public trust by airing partisan political messages under the guise of news. i also think that for the fcc to do nothing while citing freedom of speech as the reason is also a failure to the citizens of this great country. the freedom of speech issue is important, but as i understand this is a violation of election law and to do nothing while it is aired is wrong. [erjaps sinclair will be fined or somethin after the fact but the damage will hace already been done. sinclair is probably is counting on a slow reaction from an adminestration that would be glad to have this air. any fines levied later will be small price to pay when the reward is less rehulation and the opportunity to buy more stations. i reaLLY HOPE that this is not allowed to happen
